Wealth Management Discovery-Meeting Checklist

A discovery-meeting checklist for wealth-management firms that want better investor prep, cleaner fit conversations, and stronger consult confidence before the first planning meeting.

Financial advisors, wealth-management operators, marketers, and consult teams

GUIDE

A discovery-meeting checklist for wealth-management firms that want better investor prep, cleaner fit conversations, and stronger consult confidence before the first planning meeting.

WHAT THIS ASSET COVERS

- A prep checklist for documents, account context, decision-makers, and discovery expectations
- A public-page and confirmation-message structure for cleaner consult readiness
- A meeting-readiness review rhythm that improves both scheduling quality and close quality

USE THIS WHEN

1. Prospects arrive underprepared or unsure what the first meeting is for
2. The firm wants stronger education-led positioning before the consult
3. Discovery conversations vary too much based on who happened to handle prep

WORKING ASSET
WEALTH MANAGEMENT DISCOVERY-MEETING CHECKLIST

A readiness checklist for advisory firms that want more confident first meetings and fewer weak-fit consultations.

BEFORE THE MEETING

- confirm primary decision-makers
- confirm account or planning context

- confirm top goals and concerns
- confirm what documents to bring
- confirm time horizon and risk questions to discuss

PUBLIC GUIDANCE TO PROVIDE BEFOREHAND

- what the first meeting is for
- what it is not for
- what clients should bring
- how fit is evaluated
- what next steps may follow

INTERNAL CHECKLIST

- review source of inquiry
- review niche or household complexity
- review advisor-match logic
- prepare two likely next-step paths

QUALITY MARKERS

- prospect arrives informed
- fit is easier to assess
- the meeting feels calmer
- next steps are more obvious

PROVIDED BY

The Quiet Protocol

OWNER CHECKLIST

Use this checklist before the document gets handed to staff. The goal is to turn The Quiet Protocol into a live operating habit, not a file that sits in a folder.

- Name the single person who owns the workflow this asset touches.
- Pull one week of real evidence before changing anything: missed calls, form timestamps, chat transcripts, text threads, booking records, CRM notes, review requests, and staff handoff messages.

- Mark every request where the customer waited too long, repeated information, received a vague next step, or dropped before booking.
- Decide whether the issue is caused by unclear language, weak ownership, missing automation, poor routing, low trust, or a broken follow-up rhythm.
- Choose one workflow to fix first. Do not try to change phone, chat, forms, CRM, reviews, and reactivation all in the same week.
- Write the current rule in plain language. If the team cannot say the rule clearly, the customer will feel that confusion.
- Decide what good looks like. Use a response-time target, a handoff target, a booking target, or a review-request target.
- Review this asset every Friday until the workflow is stable for four straight weeks.

STAFF MEETING AGENDA

Use this agenda in a 25-minute meeting with the people who answer, route, book, follow up, or manage the customer relationship.

1. Open with the customer moment this asset is meant to improve.
2. Read one recent customer example out loud without blaming anyone on the team.
3. Ask where the current process made the customer's next step slower, less clear, or less trustworthy.
4. Review the checklist and remove any item that does not affect the customer journey.
5. Assign one owner for first response, one owner for booking or follow-up, and one owner for proof capture.
6. Decide which channel gets fixed first: phone, website form, chat, text, social message, CRM task, or review request.
7. Choose one script from this document and use it live for the next seven days.
8. Schedule the next review before the meeting ends.

COPY/PASTE SCRIPTS

Use these scripts as starting points. Replace the wording with the business name, service categories, market, office hours, and escalation rules.

Fast acknowledgement: Thanks for reaching out. I have your request and I am getting the right next step in motion now. I will confirm the details before anything is booked or assigned.

Missing information: I can help with that. To route this correctly, I need the service address or location, the best callback number, what is happening, and how urgent this feels today.

Qualified but not ready: That makes sense. I do not want this to get lost. I will save the details here and follow up at the time that makes the most sense for you.

Follow-up after silence: Just checking back so this does not sit unfinished. Do you still want help with this, or should we close the request for now?

Review invitation after the agreed service milestone: Thank you for choosing [Business]. If you would like to share your experience, you can leave an honest review here: [Review link]. Your feedback is welcome.

Use the same invitation for all eligible customers, regardless of feedback. Do not offer an incentive, ask for a particular rating or withhold the public review link because someone raised a concern.

Internal handoff: New request captured. Customer need, urgency, location, source, and next action are listed below. Please confirm ownership before the opportunity cools off.

INTAKE WORKSHEET

Field	What to Capture	Why It Matters
Customer name	Full name and preferred contact method	Prevents duplicate records and weak callbacks
Source	Phone, website, chat, referral, Google, social, repeat customer	Shows which demand channels need better routing
Urgency	Emergency, soon, flexible, research only	Controls response priority and staff escalation
Service need	Plain-language description from the customer	Helps staff avoid forcing the buyer into internal categories too early
Location	Address, city, service area, or remote context	Confirms fit before the team spends time on the wrong lead
Next step	Book, quote, call back, send info, waitlist, close	Prevents warm demand from sitting without ownership
Owner	Person responsible for the next action	Makes accountability visible
Follow-up date	Specific date and time	Turns intent into a calendar reality

METRIC TRACKER

Metric	Target	Review Rhythm	Owner
First response time	Under 5 minutes for web leads and under 4 rings for calls	Daily	Front-door owner
Qualified next step captured	90 percent or better	Weekly	Intake owner
Booking or follow-up assigned	100 percent	Weekly	Office lead
Missed inquiry recovery	Same day when possible	Weekly	Follow-up owner
Review invitations sent at the agreed milestone	Track invitations / eligible customers, independent of sentiment	Weekly	Reputation owner
Unowned open opportunities	Zero by Friday close	Weekly	Owner or manager

DECISION RULES

- If the request is urgent, route it before collecting nice-to-have details.
- If the buyer is comparison shopping, prioritize speed, proof, and a clear next step.
- If the lead is qualified but not ready, assign follow-up instead of letting the record sit open.
- If the customer repeats information twice, the handoff failed.
- If staff are rewriting the same explanation manually, turn the explanation into a script, snippet, or automation.
- If a review request depends on memory, the business does not have a review system yet.
- If the same problem appears across phone, chat, forms, and CRM, the business needs a system fix, not another reminder.

HANDOFF SOP

Use this SOP whenever a request moves from one person, channel, or system to another.

1. Confirm the customer identity and preferred contact method.

2. Summarize the need in one sentence a new team member can understand.
3. Label urgency without exaggerating.
4. Attach the source channel so reporting stays useful.
5. Record what the customer was promised.
6. Assign the next action to a named person or system.
7. Set a follow-up time.
8. Close the loop with the customer when the next action is complete.

A handoff is not complete when the note is written. It is complete when the next owner accepts responsibility and the customer knows what will happen next.

30-DAY ROLLOUT

Week 1: Audit the current workflow. Pull real examples and mark where response, routing, trust, booking, or follow-up breaks down.

Week 2: Test the working language. Use the scripts and worksheet on live customer requests. Keep the test narrow enough that the team can actually follow it.

Week 3: Add measurement. Review first response, qualified next step, booking assignment, follow-up completion, and proof capture. Fix the weakest metric first.

Week 4: Decide what should be systemized. If the workflow now works with manual ownership, keep it as an SOP. If it still depends on memory, install automation or move it into a managed AI Business Operating System.

IMPLEMENTATION NOTES

This asset is meant to be edited. Replace generic wording with the business name, service categories, staff roles, escalation rules, pricing boundaries, service-area rules, and follow-up timing. Keep the parts that make the team faster and remove anything that adds ceremony without improving the customer journey.

The best use of The Quiet Protocol is not to make the business look organized on paper. The best use is to make the next customer easier to answer, easier to qualify, easier to book, easier to follow up with, and easier to turn into visible proof.

DEPLOYMENT NOTES

HOW STRONG TEAMS USE THIS ASSET

- Assign one accountable owner instead of letting "Wealth Management Discovery-Meeting Checklist" become shared but unmanaged work.
- Use it with financial advisors, wealth-management operators, marketers, and consult teams in a weekly rhythm so the asset drives decisions rather than sitting in a folder.
- Decide in advance what counts as green, watch, and red performance so the team knows when to escalate.
- Capture learnings directly in the document every week so the asset becomes smarter over time instead of resetting to zero.

BEST NEXT SEQUENCE

- Prospects arrive underprepared or unsure what the first meeting is for
- The firm wants stronger education-led positioning before the consult
- Discovery conversations vary too much based on who happened to handle prep

WHAT SEPARATES A SERIOUS RESOURCE FROM A BASIC TEMPLATE

- Clear ownership for every step, not generic advice without accountability.
- Targets, thresholds, or decision rules that tell the team what good looks like.
- Specific working components: A prep checklist for documents, account context, decision-makers, and discovery expectations, A public-page and confirmation-message structure for cleaner consult readiness, A meeting-readiness review rhythm that improves both scheduling quality and close quality.
- A built-in review cadence so the document becomes part of operations rather than a one-time download.
